

## **STEPHEN J. BARSONY**

**Principal**

**AFH Services, Inc.**

Steve Barsony was formally a Senior Manager in a Big Four firm's Litigation Advisory Services Group. Mr. Barsony provides the legal and business community with process- and technology-based solutions. He specializes in supporting large, complex litigation. Some areas of focus include: (1) analysis, design and training for practice support systems; (2) development and implementation of document discovery methods; (3) planning and execution of electronic evidence discovery; (4) development of electronic document management, workflow, and image/data capture systems; (5) business process analysis and development and implementation of imaging-enhanced workflow; and (6) overall technology assessment for law firms and legal departments;

Mr. Barsony has 13 years experience supporting the legal and business communities. He previously worked with a leading provider of facilities management and litigation support outsourcing as a Solutions Architect, where he implemented workflow process improvement and technology solutions for AmLaw 100 firms and Fortune 250 corporations. He has managed the development, support and marketing of two imaged document management applications. Mr. Barsony has also directed the delivery of imaging, data capture and technical support services to law firms, corporations and the government for several leading litigation support organizations.

Following is a listing of representative engagements.

\*\*\*\*\*
